SUMMARY

A creative full stack web developer from Masai School. Interested in dynamic programming with intuitive problem-solving skills, having deep knowledge on HTML, CSS JavaScript, React, Redux and Typescript. Passionate about working in a product-oriented organization and eager to launch new projects.

PROJECTS

LIFESTYLE.COM

- LifeStyle.com deals with Mens,Women and Children clothing

TECH-STACK

- Cloned Lifestyle.com into a full dynamic layout and functional application with the help of advanced JavaScript and CSS. This project was a collaborative project in which 4 members participated. The aim was impliment more functionality to the website

- My responsibilities was to take care functionality part was making Navbar,footer and cart page

FARFETCH.COM

- FarFetch.com deals with various clothing and lifestyle accessories for all genders

TECH-STACK

- An individual project of cloning far fetch.com. FarFetch deals with cloth stuff and I have made it dynamic .by the use of advanced Javascript ,Es6 functionality and responsive routing to every page. Import export and advanced component structure used

SURVEYMONKEY.COM

- This website is basically used to create new surveys and creating reports of the survey

TECH-STACK

- This project was collaborative and we were 5 members .With the help of Redux,React,ES6 functionality and chakra Ui for CSS we cloned the SurveyMonkey.com ,also we used API for mounting data on the Ui , all the components are dynamic and responsive in nature.

- My responsibility was to make navbar dynamic and responsive ,also I have made the plans and pricing page with login functionality

PROFESSIONAL EXPERINCE

- Worked at my own start-up (Sushilla enterprise) , the firm deals with clothing stuff. 05/2017-12/2019

- Worked as a subject expert(Economics) for Chegg New Delhi, India 05/2020-12/2021

- Working as a software engineer intern at Ritswa software solutions,Remote -Present
